*On the well-posedness of Goursat problems in Gevrey classes*

Some authors, Nishitani [5], Hasegawa [3], Carvalho e Silva [4], have investigated the  $C^\infty$  well-posedness of Goursat problems for linear PDE's with constant coefficients. I am interested in trying to find necessary and sufficient conditions for the generalized Goursat problem to be well-posed in the Gevrey classes  $\Gamma^s$  with  $s > 1$ .
