

Princípios e representação de imagens

Prof. Luiz Otavio Murta Jr.
Informática Biomédica

Depto. de Física e Matemática (FFCLRP/USP)

- **Processamento de imagens**
- **Percepção visual**
- **Modelos de imagens**
 - Representação
 - Profundidade de pixels
- **Brilho e contraste**
- **Histograma**
 - Algoritmo de contagem de histograma
 - Equalização de histograma

Tipos de processamento de imagem

◆ Processamento Digital de Imagem (descrição)

Designação	Entrada	Saída
Síntese de Imagem	<i>Descrição</i>	<i>Imagem</i>
Processamento de Imagem	<i>Imagem</i>	<i>Imagem</i>
Análise de Imagem	<i>Imagem</i>	<i>Medidas</i>
Compreensão de Imagem	<i>Imagem</i>	<i>Descrição</i>

Domínio de aplicações 2D e 3D

O Fenômeno Visual

- Percepção sensorial da visão

O Fenômeno Visual

Anatomia da visão:

- Córnea
- Cristalino
- Retina
- Nervo ótico
- Córtex visual

O Fenômeno Visual

Percepção sensorial da visão:

- Incidência de luz na retina
- Excitação dos cones e bastonetes
- Captação do nervo ótico
- Transporte de informação para o cortex visual (cérebro)

O Fenômeno Visual

Fisiologia da visão:

- Cones
- Bastonetes

Fig. 2. Simple diagram of the organization of the retina.

O Fenômeno Visual

Fisiologia da visão:

- Cones
- Bastonetes

O Fenômeno Visual

Fisiologia da visão:

- Cones
- Bastonetes

O Fenômeno Visual

Fisiologia da visão:

- Cones
- Bastonetes

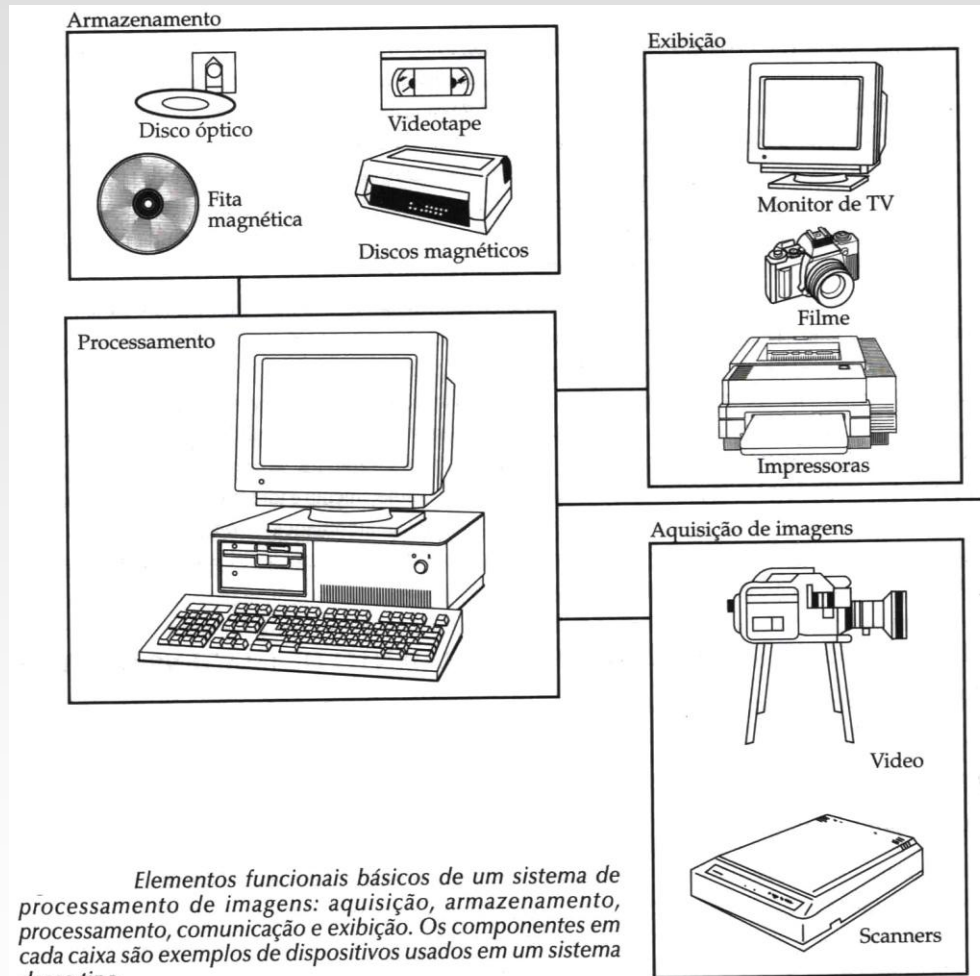

O Fenômeno Visual

Fisiologia da visão:

- Cones
- Bastonetes

Processamento de imagem

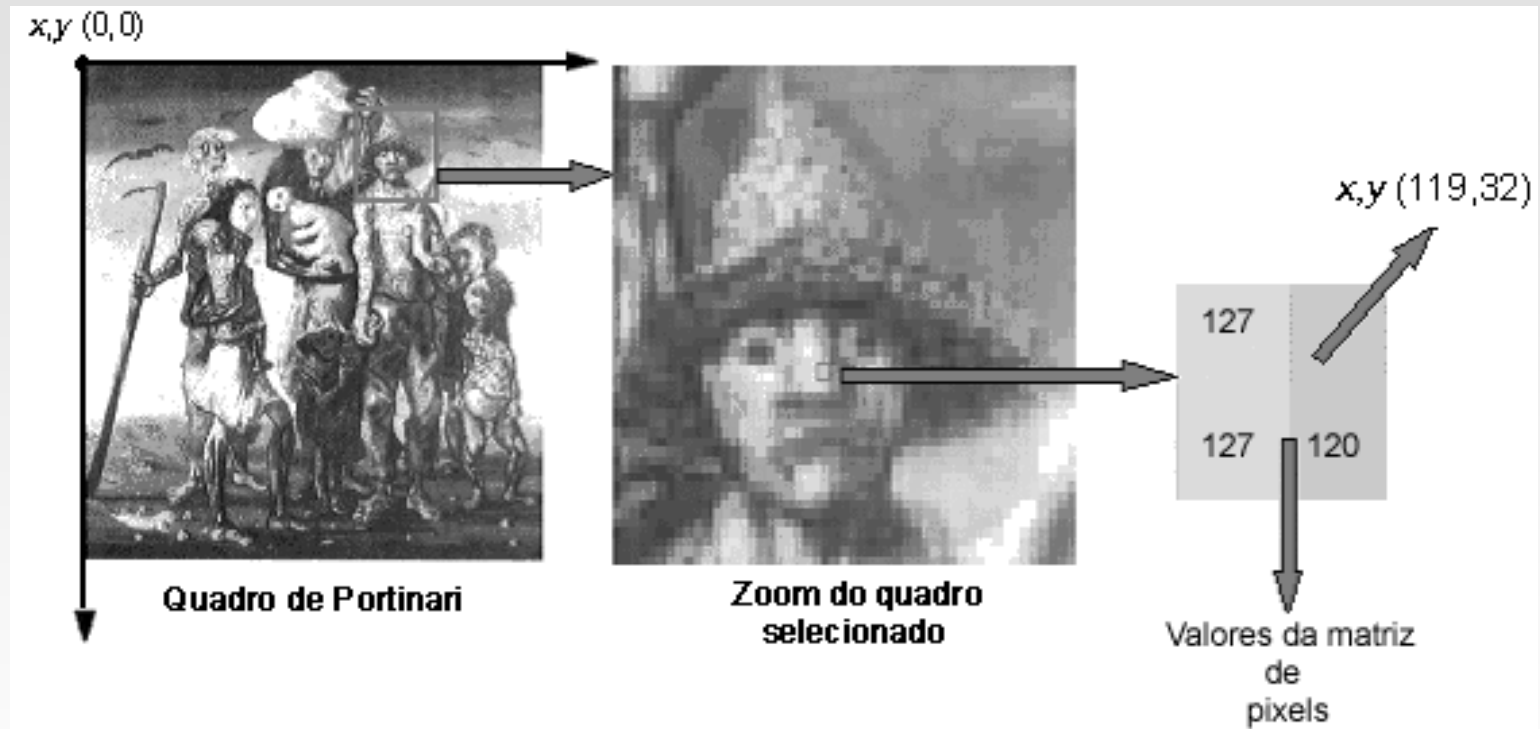

Elementos funcionais básicos de um sistema de processamento de imagens: aquisição, armazenamento, processamento, comunicação e exibição. Os componentes em cada caixa são exemplos de dispositivos usados em um sistema desse tipo.

Imagens médicas:

- ◆ Raios X
- ◆ Ressonância
- ◆ Ultra-som
- ◆ Medicina nuclear
- ◆

Amostragem e Quantização

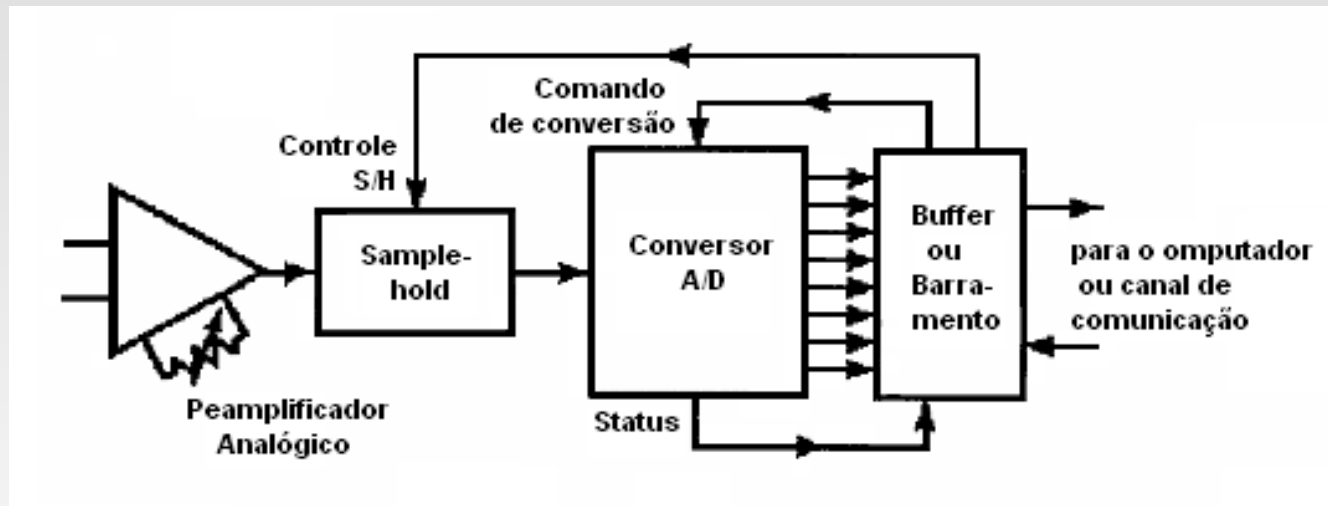

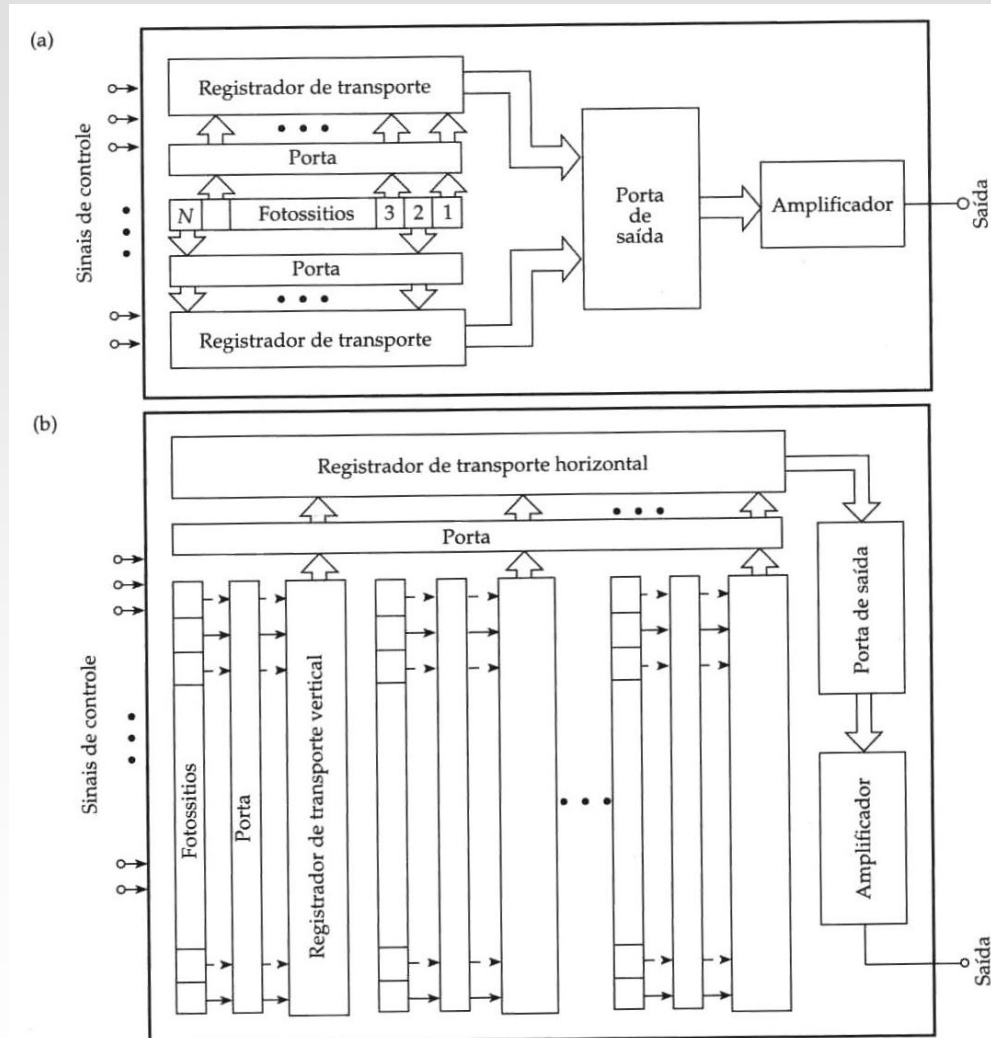

Ilustração esquemática de um sistema de conversão analógico / digital

Aquisição via CCD

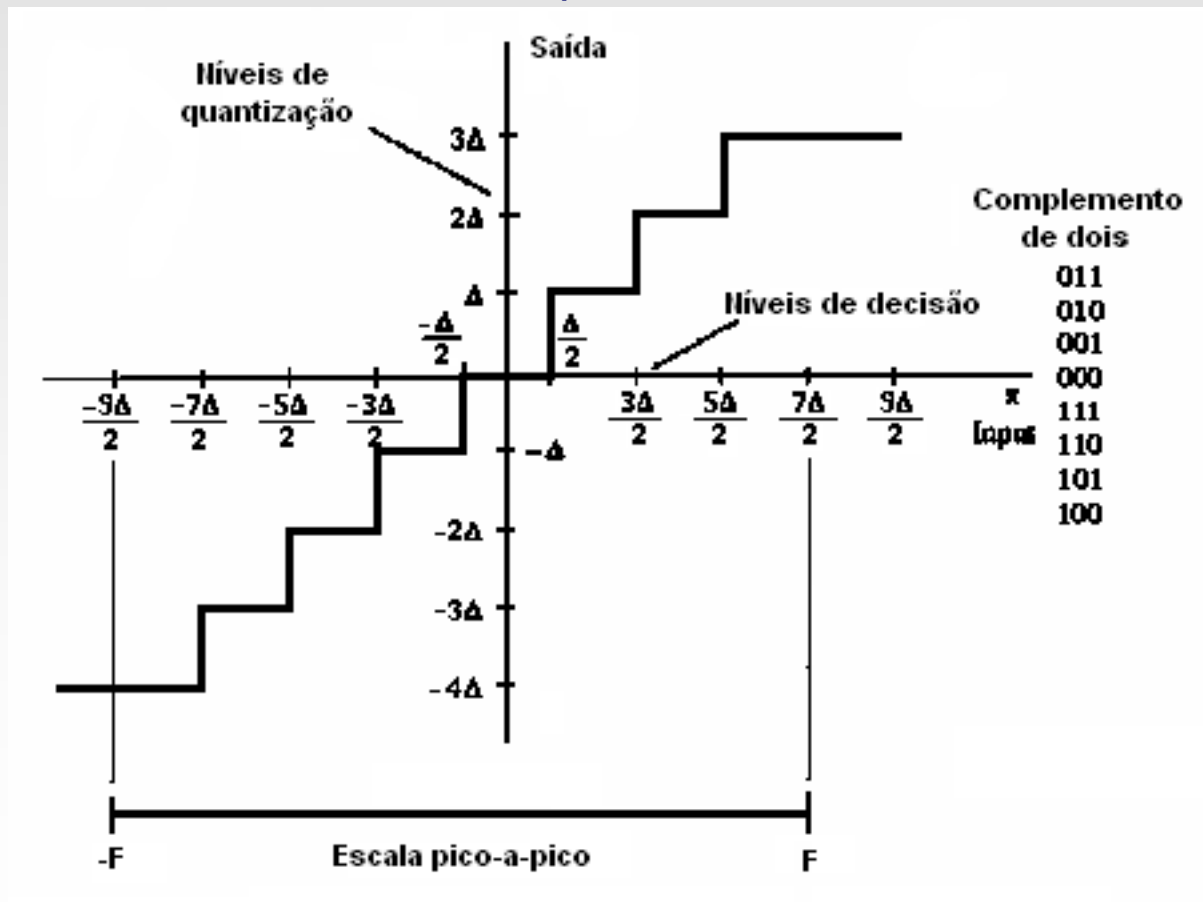

– a) Sensor CCD por varredura de linha; b) sensor CCD de área.

Amostragem e Quantização

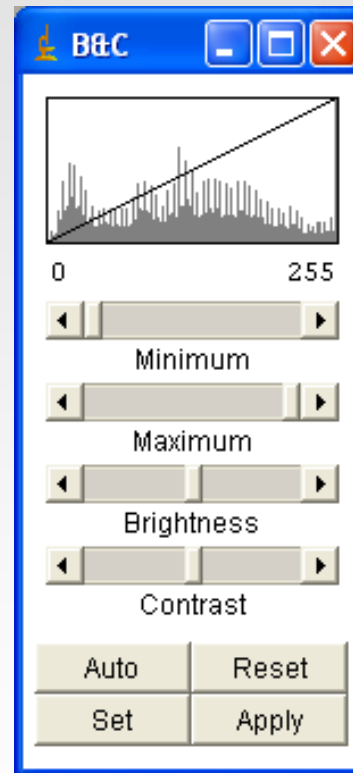

Codificação

A codificação na conversão A/D se dá atribuindo a cada valor quantizado um número binário, como no exemplo abaixo.

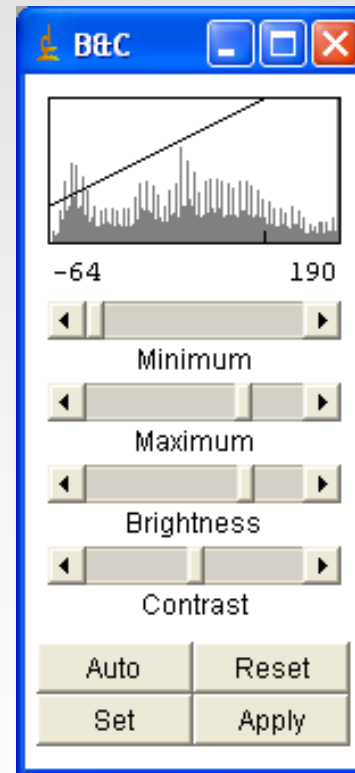

Brilho, Contraste e Histograma

histograma de imagem com brilho e contraste originais

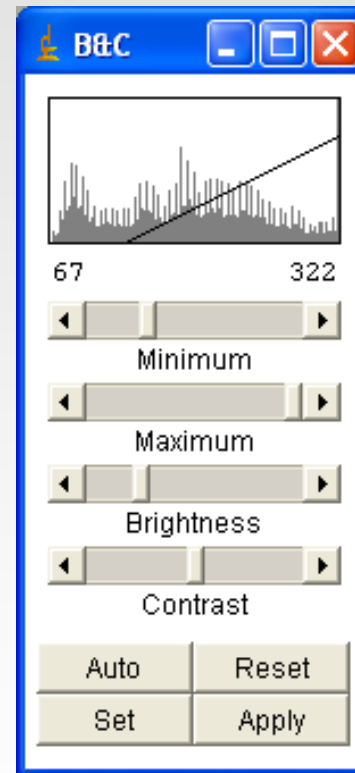

Brilho, Contraste e Histograma

histograma de imagem com brilho incrementado

Brilho, Contraste e Histograma

histograma de imagem com brilho reduzido

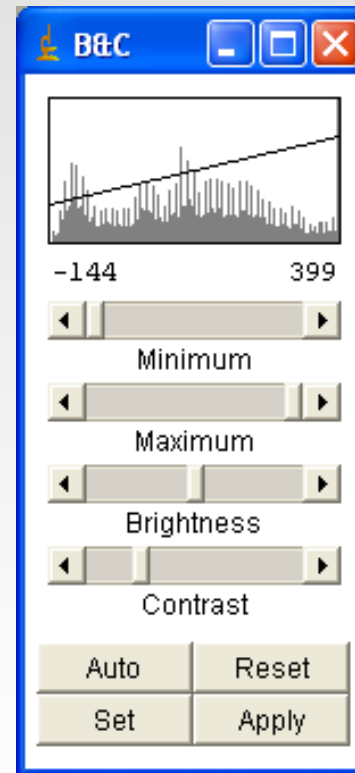

Brilho, Contraste e Histograma

histograma de imagem com contraste incrementado

Brilho, Contraste e Histograma

histograma de imagem com contraste reduzido

Histograma

- Contagem de pixels em cada tom de cinza

Histograma

$h(i)$	0	2	10	0	0	0	5	7	3	9	1	6	3	6	3	2
i	0	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15

- Contagem de pixels em cada tom de cinza

- Diferentes imagens podem ter o mesmo histograma?

Histograma

Histogramas distribuídos significam melhores imagens?

(a)

(b)

(c)

(d)

Algoritmo:

```
1 public class Compute_Histogram implements PlugInFilter {
2
3     public int setup(String arg, ImagePlus img) {
4         return DOES_8G + NO_CHANGES;
5     }
6
7     public void run(ImageProcessor ip) {
8         int[] H = new int[256]; // histogram array
9         int w = ip.getWidth();
10        int h = ip.getHeight();
11
12        for (int v = 0; v < h; v++) {
13            for (int u = 0; u < w; u++) {
14                int i = ip.getPixel(u,v);
15                H[i] = H[i] + 1;
16            }
17        }
18        ... //histogram H[] can now be used
19    }
20
21 } // end of class Compute_Histogram
```

Algoritmo de histograma de tamanho definido:

```
1  int[] binnedHistogram(ImageProcessor ip) {
2      int K = 256; // number of intensity values
3      int B = 32; // size of histogram, must be defined
4      int[] H = new int[B]; // histogram array
5      int w = ip.getWidth();
6      int h = ip.getHeight();
7
8      for (int v = 0; v < h; v++) {
9          for (int u = 0; u < w; u++) {
10             int a = ip.getPixel(u, v);
11             int i = a * B / K; // integer operations only!
12             H[i] = H[i] + 1;
13         }
14     }
15     // return binned histogram
16     return H;
17 }
```

Transformação de níveis de cinza

$$\longrightarrow f(x) = O_{\min} + \frac{O_{\max} - O_{\min}}{(I_{\max} - I_{\min})^\gamma} (x - I_{\min})^\gamma$$

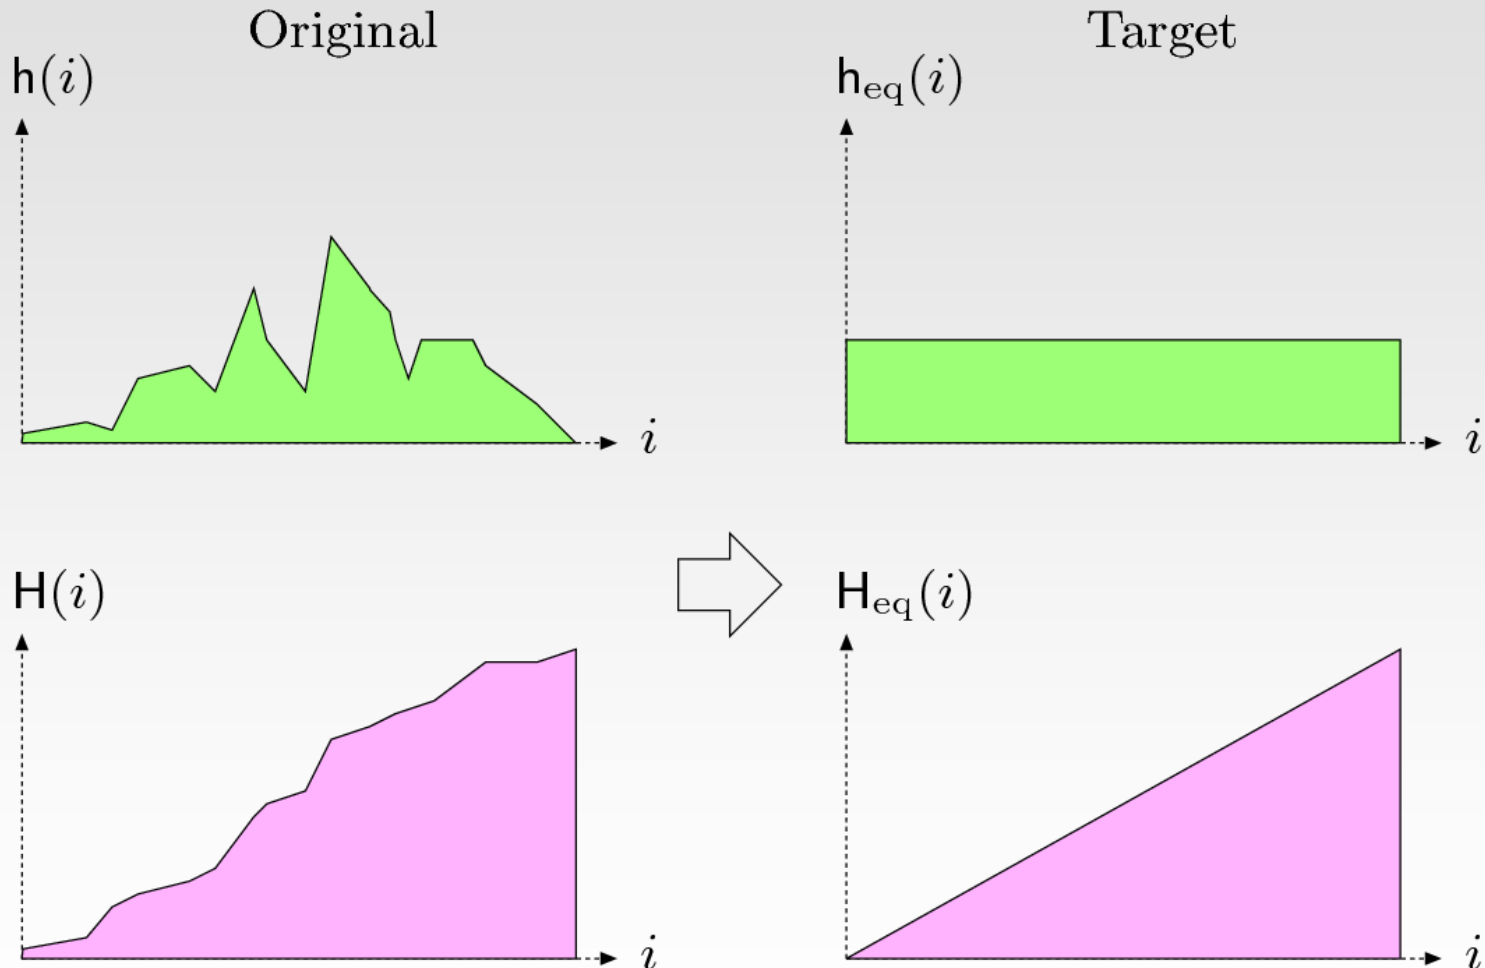

Equalização de histograma

Equalização de histograma

Equalização de histograma

Equalização de histograma

Objetivo: encontrar uma função que equalize o histograma

$$f_{\text{eq}}(a) = \left\lfloor H(a) \cdot \frac{K-1}{MN} \right\rfloor$$

Equalização de histograma

(a)

(b)

(c)

(d)

(e)

(f)

Equalização de histograma

Assuma por um momento que níveis de intensidade são quantidades contínuas normalizadas para o escopo [0, 1],
- função de densidade de probabilidade (PDF)

$$\sum_i h(i) = M \cdot N \quad p(i) = \frac{h(i)}{MN} \quad \sum_i p(i) = 1$$

$$P(i) = \frac{H(i)}{H(K-1)} = \frac{H(i)}{MN} = \sum_{j=0}^i \frac{h(j)}{MN} \\ = \sum_{j=0}^i p(j) \quad \text{para } 0 \leq i < K$$

Desejado:

$$p_s(s) = \begin{cases} 1 & \text{for } 0 \leq s \leq 1 \\ 0 & \text{otherwise} \end{cases}$$

Transformação:

para $k = 1, 2, \dots, L$ onde s_k é o valor de intensidade na imagem de saída (processada) que corresponde aos valores r_k na imagem de entrada

$$s_k = T(r_k) \\ = \sum_{j=1}^k p_r(r_j) \\ = \sum_{j=1}^k \frac{n_j}{n}$$

Equalização de histograma

Histograma cumulativo

```
1: CDF(h)
   Returns the cumulative distribution function  $P(i) \in [0, 1]$  for a discrete histogram  $h(i)$ , with  $i = 0, \dots, K-1$ .
2: Let  $K \leftarrow \text{Size}(h)$ 
3: Let  $n \leftarrow \sum_{i=0}^{K-1} h(i)$ 
4: Create table P of size  $K$ 
5: Let  $c \leftarrow h(0)$ 
6:  $P(0) \leftarrow c/n$ 
7: for  $i \leftarrow 1 \dots (K-1)$  do
8:      $c \leftarrow c + h(i)$                                 ▷ cumulate histogram values
9:      $P(i) \leftarrow c/n$ 
10: return P.
```

Equalização de histograma

```
1  public void run(ImageProcessor ip) {
2      int w = ip.getWidth();
3      int h = ip.getHeight();
4      int M = w * h;    // total number of image pixels
5      int K = 256;     // number of intensity values
6
7      // compute the cumulative histogram:
8      int[] H = ip.getHistogram();
9      for (int j = 1; j < H.length; j++) {
10         H[j] = H[j-1] + H[j];
11     }
12
13     // equalize the image:
14     for (int v = 0; v < h; v++) {
15         for (int u = 0; u < w; u++) {
16             int a = ip.get(u, v);
17             int b = H[a] * (K-1) / M;
18             ip.set(u, v, b);
19         }
20     }
21 }
```

Equalização de histograma

Histograma cumulativo

```
1  public void run(ImageProcessor ip) {
2      int w = ip.getWidth();
3      int h = ip.getHeight();
4      int M = w * h;    // total number of image pixels
5      int K = 256;     // number of intensity values
6
7      // compute the cumulative histogram:
8      int[] H = ip.getHistogram();
9      for (int j = 1; j < H.length; j++) {
